Dear Dr. Susanto:

Your manuscript entitled "Human Papillomavirus Vaccine Acceptability Among Healthcare Workers, Parents, and Adolescents Pupils: A Pilot study in public health centers of Bali, Indonesia" has been successfully submitted online and is presently being given full consideration for publication in GERMS.

Your manuscript ID is GERMS-OA-2020-0026.

Please mention the above manuscript ID in all future correspondence or when calling the office for questions. If there are any changes in your street address or e-mail address, please log in to ScholarOne Manuscripts at <https://mc04.manuscriptcentral.com/germs> and edit your user information as appropriate.

You can also view the status of your manuscript at any time by checking your Author Center after logging in to <https://mc04.manuscriptcentral.com/germs>

Thank you for submitting your manuscript to GERMS.

Sincerely,
GERMS Editorial Office
www.germs.ro

Cc: office@jccp.ro

29-Apr-2020

Dear Dr. Susanto:

I am contacting you regarding the manuscript # GERMS-C-2020-0017 entitled "Multilevel Intervention for Treatment HIV/AIDS in Indonesian Community" which you submitted to GERMS.

We are unable to publish your article in GERMS at this point. However, we would consider evaluating a substantially revised version of the manuscript for publication in JCCP - Journal of Contemporary Clinical Practice. This is also an open access journal that we publish biannually. If you are able to revise the manuscript by 05 May according to the comments mentioned below, the publication fee can be waived and it can be reviewed for the journal's upcoming issue in May.

To submit your revised manuscript to JCCP go to www.jccp.ro and click on Submit your manuscript online.

Sincerely,
Dr. Oana Sandulescu
Editor, GERMS

Associate Editor Comments to Author:

Editor

Comments to the Author:

- Please add the title page to the manuscript. According to the journal's instructions for authors, the title page should contain: full manuscript title, running head, article byline including full author names (written as First name Last name). Each author will be assigned a consecutive number in the byline and for each author the titles/degrees (e.g.: MD, PhD) and full affiliation(s), along with the postal address, should be listed. The name and address of the corresponding author should be separately and clearly indicated with email and telephone details.
- Please see attached the iThenticate similarity check and address any potential highlighted issues.
- Please revise the use of the term "HIV/AIDS infectious diseases".
- Please revise the following phrase: "HIV/AIDS is a global problem that results in death from attacking the immune system". While HIV infection was uniformly fatal before the advent of ART, the current life expectancy is similar to that of the general population, in the presence of effective ART.
- The following phrase is not very clear: "The number of patients infected with HIV in Indonesia for the first quarter of 10,376 people"
- What is meant by "the high transmission of HIV/AIDS"? What is the local incidence of HIV infection?
- The following phrase is not very clear: "The risk of HIV transmission and AIDS treatment involves complex behavior"
- Please give examples of "Ecological models", or describe this approach in a little more detail, to make it understandable by the readership of the journal.
- It would be best to refer to "HIV infection" instead of "HIV/AIDS".
- From the current form of the manuscript, it is not clear what the proposed "multi-level intervention" is. Please elaborate.
- For references which are websites, please provide the date of accession.
- For Correspondence articles, the instructions for authors state that a maximum of 5 relevant references can be included.

Reviewers' Comments to Author:

Reviewer: 1

Comments to the Author

Could author please explain the multilevel Intervention and Socio-ecological model in detail?
The representativeness of the article is not enough since it describe the situation in Indonesian Community

Reviewer: 2

Comments to the Author

T Susanto et al., discusses the importance and value of multi-level intervention for treatment HIV/AIDS in Indonesian community with socio-ecological approaches, but it would be more innovative within these major modify:

- 1) Discuss the priorities in HIV/AIDS prevention and control in Indonesian community;
- 2) Add picture to show clear and specific corresponding multi-level interventions;
- 3) Compare with those already done socio-ecological studies on PLWH recent years.

Minor modify:

- 1) References, please unify the format;

2) Reference 9, please cite publication that have been peer-reviewed instead of online materials. GERMS_C_2020_0017.pdf

Supplementary information:

If you provided your ORCID iD when submitting your manuscript, you can now opt in to having your ORCID record automatically updated when your article is published, by doing the following:

1. Look out for an email from Crossref in your ORCID Inbox requesting permission to access your ORCID record. Crossref is the non-profit organization where we register the article metadata and its persistent identifier, the DOI, to make your article discoverable and citeable.
2. Grant Crossref permission and then every time you publish an article with a Crossref member publisher (there are over 7,000) and provide your ORCID ID your ORCID record will be automatically updated without you having to do anything.

More information about Crossref's ORCID auto-update is available here:
